**AI** *for juniors*<sup>!</sup>  
by elyst AI

**May Batch**

a 5-day program where your child will  
*build* with AI in just **5 days.**

# This summer, your child has a **choice**.

elyst AI

**SCROLL. WATCH. FORGET.**

**OR**

Build a poster.  
Compose a song.  
Create a video.  
Create a website.

Completely  
Online

Perfect for Classes  
5-10 Students

## All using AI. In just **5** days

This is not a theory class. There are no boring slides or long lectures.

From Day 1, your child use AI tools, talk to them, experiment and actually create with them.

# What they will *build*

elyst AI

By the end of the program, every student will have created real projects using AI.

In 5 days, your child will **create** these 5 real **projects**:-

Poster

Song

Video

Website

Study System

# What happens *day by day!*

elyst AI

**DAY 01**

First conversation with AI. Understanding what it is and how to talk to it effectively.

**DAY 02**

Learning to prompt. How to ask AI the right way and get the right results. Step into creative AI by composing a song.

**DAY 03**

Creative day. Where they design a poster and generate a video all with AI.

**DAY 04**

Study smarter. Use AI to understand concepts, make notes, and revise better.

**DAY 05**

Build, develop and publish their own website from scratch.

*this is  
soo cool!*

but why?

# AI *for juniors*

by elyst AI

→ **Live + Recorded sessions.**

Every session happens live. Your child can ask questions, get stuck, and get help in real time.

→ **Bilingual - Malayalam + English**

Every concept explained in both languages. Your child never feels lost because of language.

→ **Small batch. Real attention.**

Not a webinar with 100 students. Every child is seen, heard, and helped.

→ **Not just a certificate.**

A poster. A song. A video. A website. A study system. Things they built. Things they can show.

→ **Morning & Evening batches.**

10 - 11.30 AM IST or 7 - 8.30 PM IST.  
Pick what works for you!

# Who is the *mentor*?

She holds a BTech in Artificial Intelligence and is among the **first** generation of AI graduates in India.

She co-founded **Elyst AI**, a company that builds AI systems for businesses.

**This is not a side project for her. AI is her work, her business and daily life.**

• **Fathima Shirin P** •

She has trained **2000+** students across **30+** live sessions.

**AI for Juniors** is her way of bringing that same depth of knowledge to school students, at a price every family can afford.

## About **elyst AI**

Elyst AI is **not** an ed-tech startup that sells courses. **We are an AI company.**

We **build** AI systems for businesses. We consult. We implement. We automate. AI is **not** something we teach on the side, it is what we **do** every day, for **real** clients, with **real** results.

When we teach, we teach from the inside. **Not** from a textbook. **Not** from a YouTube playlist.

From actual experience of using AI to build things.

👉 **AI for Juniors** is that same knowledge, simplified, structured, and made accessible for school students.

# What *now*?

elyst AI

By the end of the program, every student will have created real projects using AI.

₹999

Limited seats!

Enroll now!

That is the complete cost of the program!

Your child's future with *AI* starts *here!*

# Your questions *answered*

elyst AI

**My child has never used AI. Is this okay?**

**Perfect, actually. The program starts from zero. Day 1 is literally the first conversation with AI.**

**Are the sessions recorded?**

**Yes. Every session recording is available for 1 month so your child can revisit anything they missed or want to practice again.**

**What language are the sessions in?**

**Malayalam and English. Your child can ask questions in whichever language they are comfortable with.**

**Is ₹999 really the full amount?**

**Yes. One payment. Nothing else.  
No software to buy. No hidden fees.**

**My child is busy some days. Can they manage?**

**Each session is only 90 minutes. Morning or evening, pick the batch that fits your schedule.**

**My child is in Class 5. Is this too advanced?**

**Not at all. The program is designed for Class 5 to Class 10 students. No technical / coding knowledge needed.**

**How do I register?**

**WhatsApp us at +91 96332 88931 or fill the registration form at [elystai.com/ai-for-juniors](https://elystai.com/ai-for-juniors). We will confirm your seat.**
